

Transforming Delivery Operations with Smart Technology

Skynet Delivery Hub is a complete Delivery Management Solution designed to streamline operations, enhance real-time visibility and deliver a seamless experience for both businesses and customers

By combining a powerful Admin Panel, an intuitive Delivery Rider App, and a Real-Time Customer Tracking Interface, this solution ensures complete control and transparency across the entire delivery lifecycle.

Key Challenges Solved

Smart Admin Control Panel

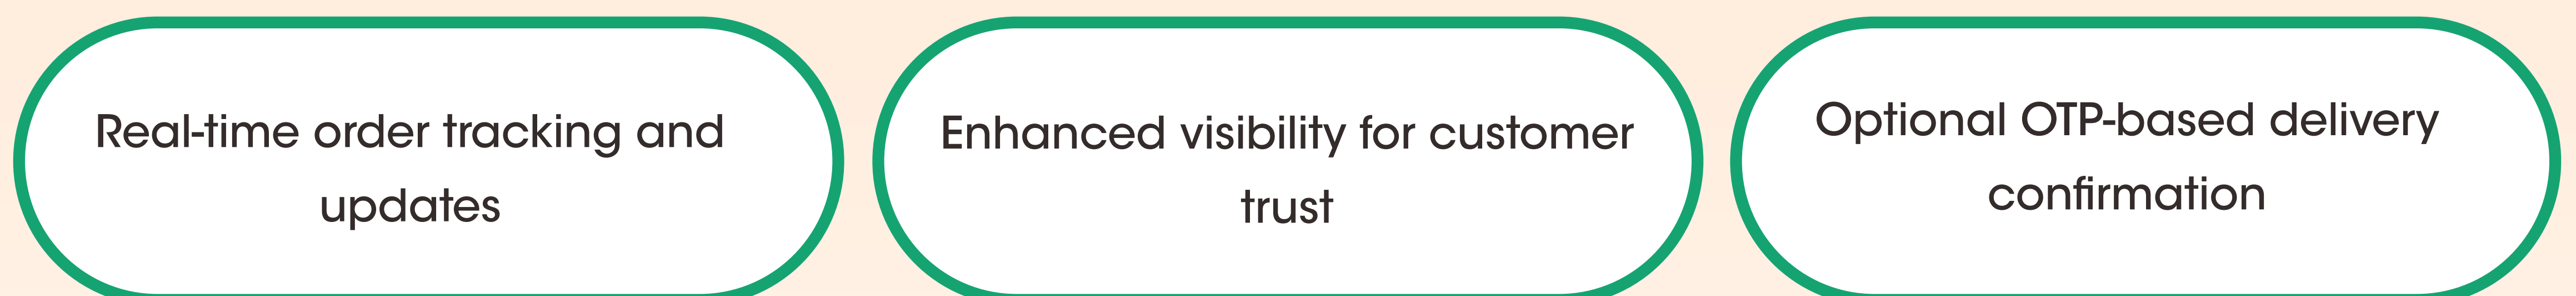

- ★ Centralized dashboard for complete order management
- ★ Real-time rider assignment and monitoring
- ★ Live map tracking of deliveries
- ★ COD & prepaid payment reconciliation
- ★ Advanced reporting and performance analytics
- ★ Proof of delivery with OTP & digital signature

Delivery Rider App (Android)

- ★ Secure login with efficient task handling
- ★ Accept/reject orders with reason tracking
- ★ Status-based workflow (Accepted → Dispatched → Delivered → Completed → Rejected)
- ★ Integrated navigation (in-app + Google Maps)
- ★ Optimized routes for faster deliveries
- ★ Real-time delivery status updates
- ★ OTP verification, signature & image capture
- ★ Live GPS tracking for full transparency

Customer Tracking Experience

Advanced Capabilities

- ▶ Intelligent route optimization
- ▶ Geo-tagged proof of delivery (time & location)
- ▶ Delivery attempt tracking & failure insights
- ▶ Rider performance analytics dashboard
- ▶ Secure and verified delivery process

The Outcome

A scalable, intelligent delivery ecosystem that delivers:

- ▶ Higher operational efficiency
- ▶ Greater visibility and control
- ▶ Improved delivery performance
- ▶ Enhanced customer satisfaction
