

# Your Complete Platform for Global Student Placement

**Skynet EduCon** is a unified digital platform built to optimize how student consultancies operate. From the first point of contact with a student to their successful enrollment at an international university, the system supports every step with precision and clarity. Designed specifically for the education consultancy sector, it brings structure to complex workflows by connecting departments, automating routine processes, and improving team coordination. With dedicated access levels for different user roles and the ability to manage dozens of data points, Skynet EduCon empowers teams to work smarter, deliver faster, and scale confidently—without relying on disconnected tools or manual tracking.

## Objectives

### Centralize Operations

Eliminate tool fragmentation by integrating all workflows into a single platform.

### Enable Collaboration

Allow seamless communication across coordinators, counselors, agents, and admins

### Improve Data Accuracy

Avoid manual errors and data duplication with structured, cloud-based management.

### Automate Workflows

Reduce administrative effort and streamline repetitive recruitment tasks.

### Boost Transparency

Provide real-time visibility into application statuses, tasks, and agent activity.

### Scale Seamlessly

Accommodate more users, processes, and geographies as your consultancy grows.

### Ensure Compliance

Maintain accurate documentation, agent agreements, and audit-ready logs

## Key Features

### Role-Based Dashboards

- Custom dashboards for Admins, BDMs, Counselors, and Agents
- Real-time metrics, activities, and task statuses

### Student Lifecycle Management

- Lead capture, assessment forms, and document collection
- Application handling, visa processing, interview scheduling
- Language classes, test booking, and payment tracking

### Automation & Task Workflows

- Auto-routing of leads, application updates, and task reminders
- Daily activity logs and reporting for accountability

### Content Tools for SOPs

- Role-based content writing for SOP generation
- Category-based content repository for efficiency

### Quality Assurance Module

- Verify submitted student applications
- Ensure compliance with university and internal quality standards

### Smart User & Role Management

- 19 user roles, each with tailored access rights
- Department creation and role-specific task assignments

### Agent & Partner University Management

- Agent profiles, MOUs, visit records, and commission tracking
- University database with course details and eligibility rules

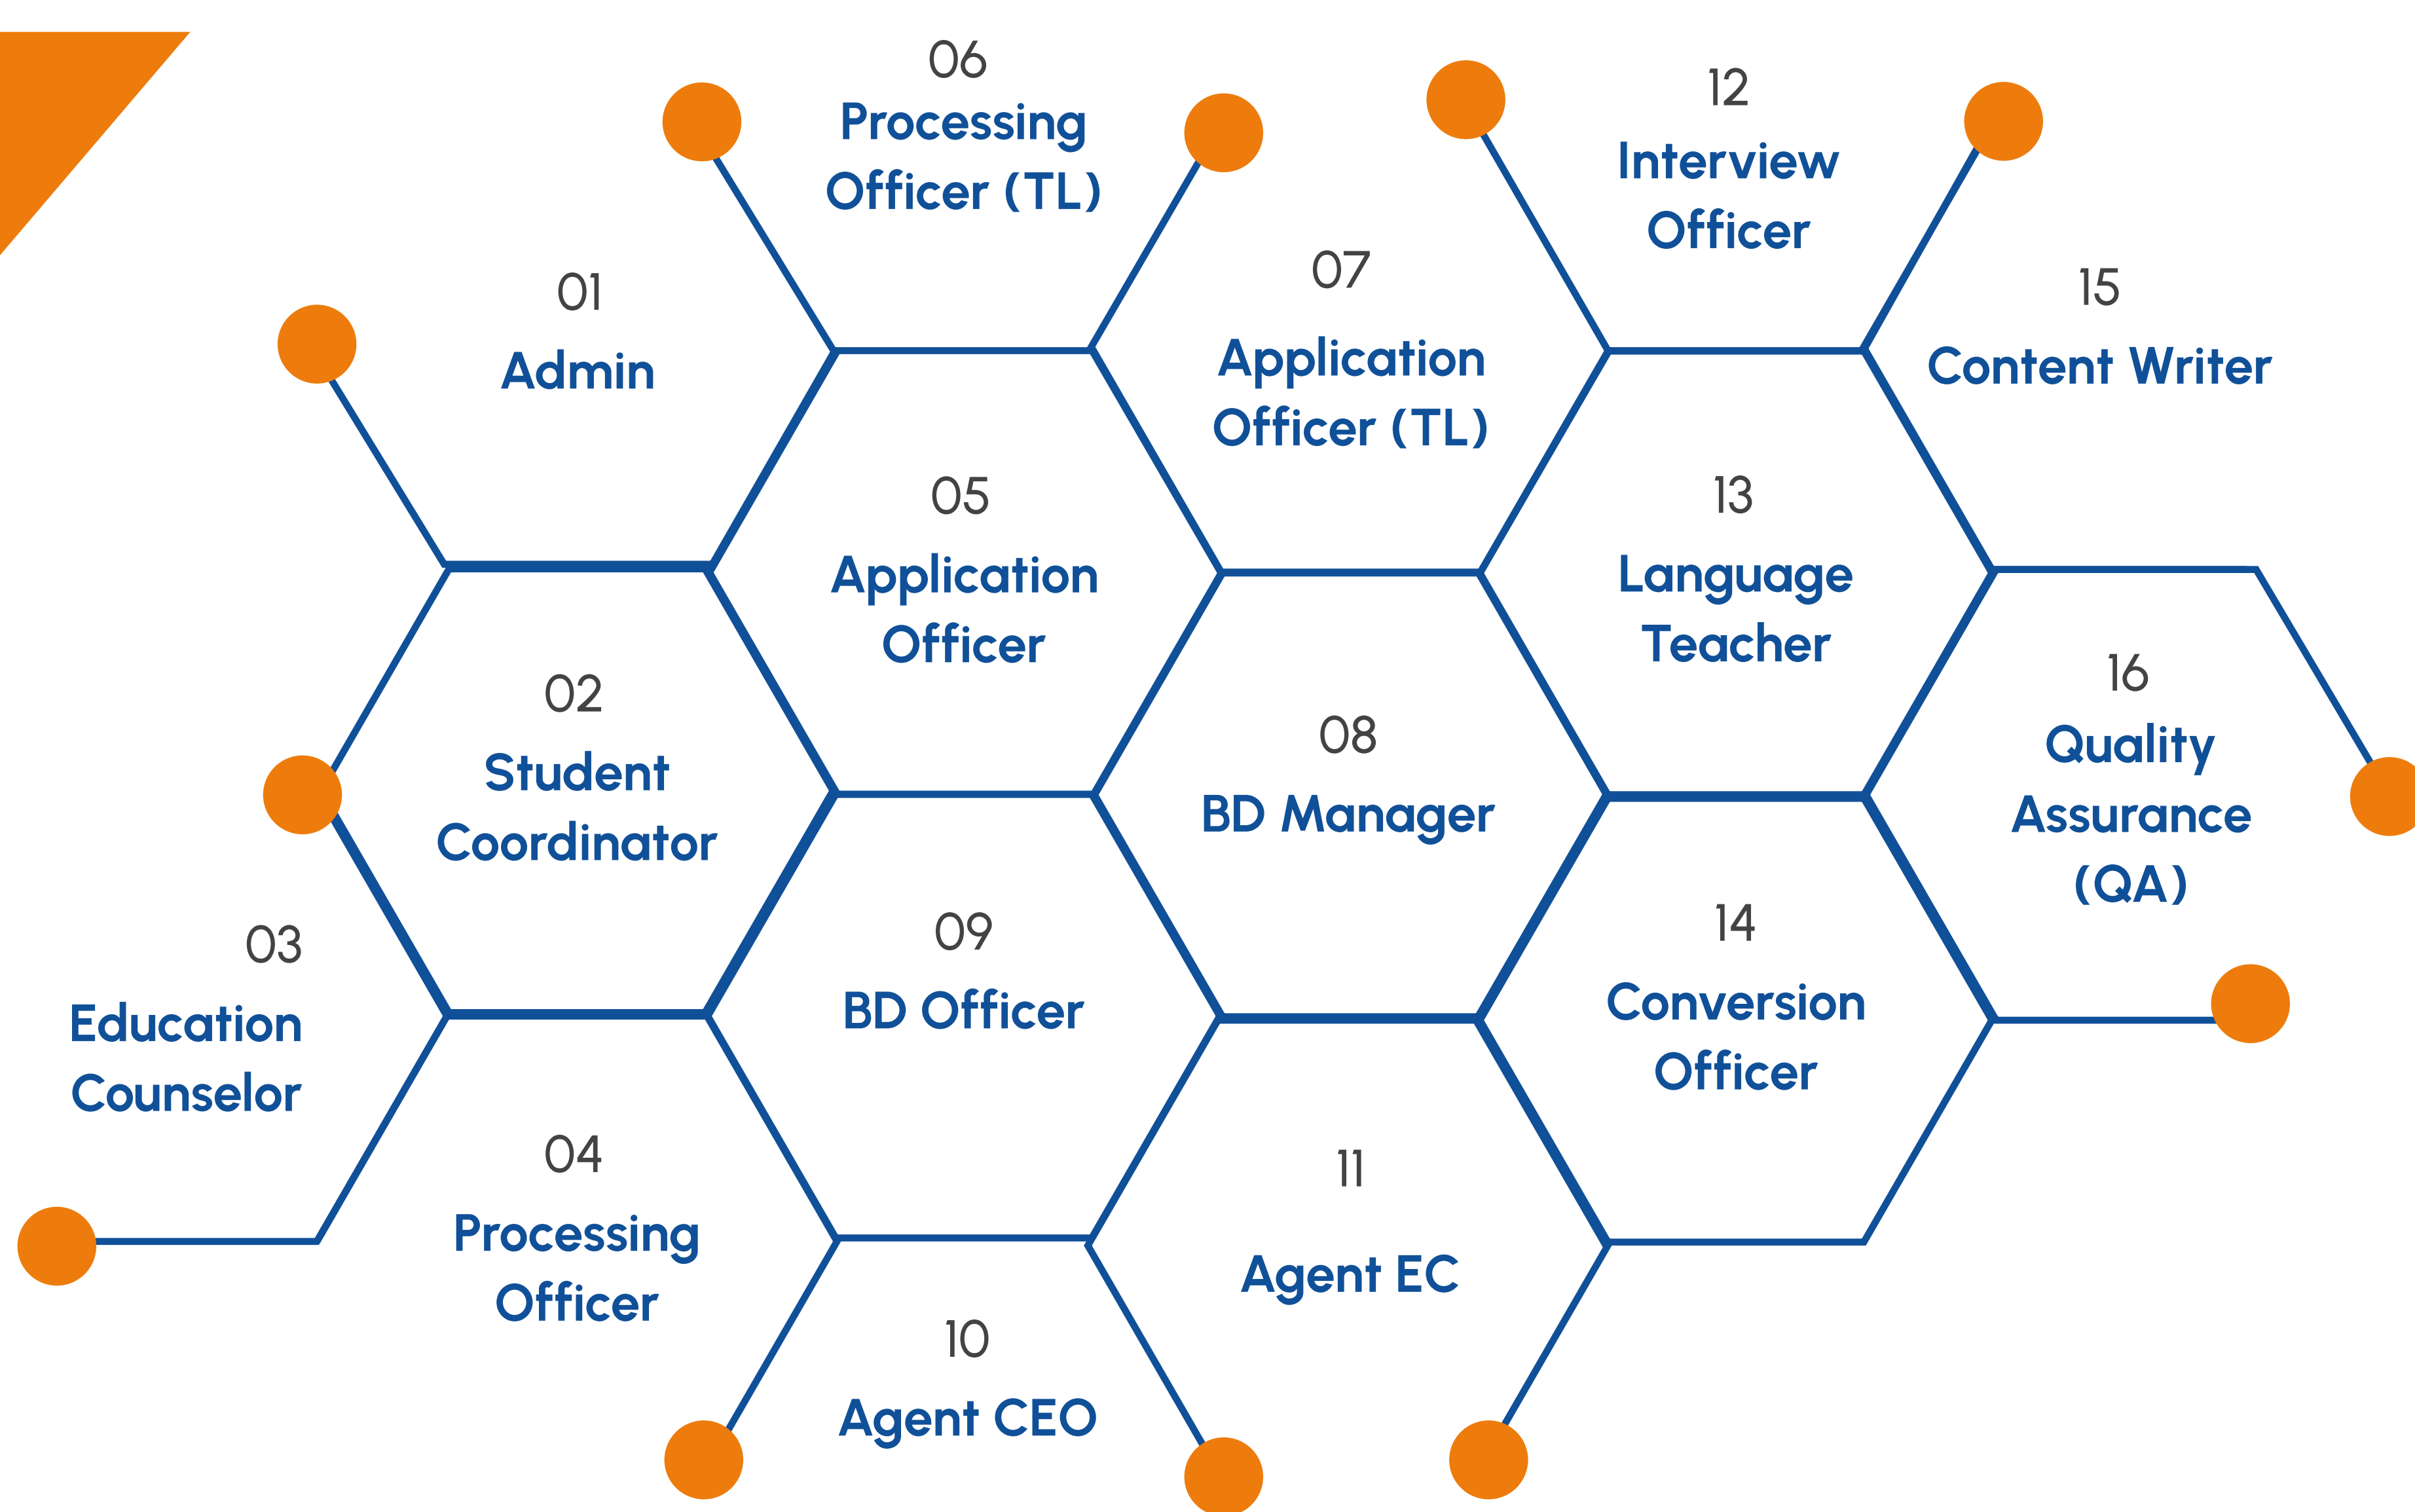

### Classroom & Interview Coordination

- Manage language courses and instructors
- Upload interview training materials and schedule sessions

### Integrated Communication

- In-platform chat between users
- Record internal MoMs (Minutes of Meeting)

## Key Roles

## Solution Benefits

### Real-Time Monitoring

Dashboards and logs for insights across all levels of operations

### Automation & Accuracy

Less manual work, fewer errors, more productivity

### Secure & Scalable

Built with enterprise-grade security and scalability in mind

### Improved Collaboration

Centralized communication and role-based task distribution

### Organized Data Handling

Every document, form, and lead managed from one place

## Why Skynet EduCon?

Because modern student recruitment needs more than spreadsheets and WhatsApp. Skynet EduCon provides a complete digital infrastructure that supports global education consultants, agencies, and student service firms—at scale.
